

**MISSION 30**

# **Rescuing the Lost Baby Seals of the Baltic**

**Seals aren't just adorable.**

**They're also great hunters, helping to keep fish populations in check and ocean ecosystems in balance.**

But right now, **they're in danger.**

**More and more seal pups wash up  
alone on the Southern shore of the  
Baltic, separated from their  
mothers, malnourished and more  
vulnerable to predators.**

We went to the Baltic coast to learn  
why this is happening and to  
do something about it.

**Meet a lost seal pup: Jasti.**

**Just about two weeks old, she  
was found alone, malnourished  
and dehydrated.  
But there's hope!**

Together with a local ocean research and seal rescue centre, **we're helping to rescue pups like her,** raise them safely and release them back into the wild.

Find out how we're turning this tragedy  
into a heartwarming comeback story!

**Watch the mission video!**
